

United Church Notes

Rev. E. Longmire, Minister
Irma Sunday School, 11 a.m.
Public Worship, 7:30 p.m.
Mid-week prayer and Fellowship service, Wednesday evening, 8 p.m.
A hearty welcome to all.

On Wednesday evening, March 2nd, our young people turned out in full force for a return visit and debate with the Wainwright group. The subject of the debate, "Resolved that an accident plays a more important part in life than design," was chosen by the Wainwright group with Irma supporting the negative. The judges' decision was in favor of the Irma group who were represented on the platform by Ralph Congdon and Harold Gulbra. Following the debate the visitors were entertained to lunch and a splendid entertainment of music and games. The young people all reported a very enjoyable time with their neighbors. This makes the second favorable decision for the Irma group and places them in the inter-denominational debate.

Another section states that when a motor vehicle is sold, license plates previously issued are to be returned to the provincial secretary's department and the new owner must make application for issuance of new plates. Persons who sell and buy motor vehicles must give the provincial secretary's department notice of such transaction.

Provision also is made that every vehicle about to enter or cross a main highway shall stop not less than 30 feet from it, and will not proceed again until it has been established that there is no danger from other traffic.

We desire to call the attention of our members and friends to a church rally to be held in the church Tuesday evening, March 15th, at 8 o'clock. Reports from the various organizations of the church will be given, to be followed by a short program of music. Ladies of the congregation will serve lunch. It is hoped we shall have a good attendance for this gathering.

PHILLIPS NEWS ITEMS

Mrs. L. Hagenson left on Tuesday evening's train for Edmonton where she will visit her parents.

Mr. and Mrs. J. D. Evans celebrated their forty-fourth wedding anniversary Saturday, March 5th.

L. Doherty motored to Edmonton on Saturday.

Among those visiting in the city over the week-end were Mrs. D. Draper and Mavis; also Norman Cooper.

Mrs. Wm. Heslop and John were visitors at Phillips Tuesday; also Frank Alcock of Kinsella.

The recent thaw has made skating on the ponds welcome entertainment; on Sunday a large crowd' were out skating.

Don't forget the social evening at Quince school, March 18th. What and Bingo will be played.

Miss P. Collier, B.A., and Miss Ross, teachers in the district, were Viking visitors Saturday and Sunday.

Oil Industry Pays Large
Amounts In Taxes

Unkind things are apt to be said in these days of stress about industry but industry at the same time can help the public to understand its own troubles.

It might not be amiss, for example, to draw attention to the fact the oil industry, in good times and bad, has not only met every public obligation without asking for financial aid from the taxpayer. On the other hand it is contributing to the support of government in the form of taxes upon its properties, products and operations at the staggering rate of \$1,181,000,000 per annum in the United States alone.

This tax bill is but slightly less than the \$1,373,000,000 which the industry pays to labor and four times the amount paid to the large number of persons who furnish the required capital.

Apart from this, if the oil industry's achievements were to be measured in terms of public service, there would be big credits under such items as quality of product, wages and working conditions of employees, and during the past year an approach to a more reasonable return on invested capital, notwithstanding increasing costs of finding and producing petroleum from deeper levels, and increased cost of materials and supplies.

Kinsella Kernels.

Mr. and Mrs. R. S. Nease spent the week-end in Edmonton.

The tennis club held a dance last Saturday, March 5th. A large crowd attended. The club will sponsor another dance soon. Much work is to be done on the court this year, and we hope to raise sufficient funds to meet the expenses.

Mrs. Ferries spent last week visiting in Edmonton.

Mr. W. L. Ferries, Mr. and Mrs. P. Napier and Jean motored to Edmonton on Sunday.

Mr. J. Kapler, Mr. L. Witton and Mr. L. Smart spent Sunday and Monday in Edmonton.

Mr. and Mrs. C. Dupre of Edmonton were visitors in town last Friday and Saturday.

Mr. E. C. Williams returned from Edmonton, having had his tonsils removed in hospital there last week.

We are glad to report little George Carpenter much better and home from the hospital.

Hockey Notes

Orbendale Beats Roseberry 5-0

The play-off games between the out-of-town teams, namely Roseberry and Orbendale, are being played on the Irma rink this week, more from a point of necessity rather than convenience as the ice in those districts has run off away down the slope.

The first game was played last Tuesday evening before a fairly large crowd of fans. During the first period the Roseberry boys kept the play down towards the Orbendale goal a greater part of the time, but Orbendale managed to score one in this period from the stick of F. Myers. In the second period neither side scored. When the third period opened Orbendale had decided to show what they could do when they wanted to do it. In this period F. Lukens scored three goals and W. Glover one, making the final score 5-0.

The Orbendale players made use of combination play with fairly good effect, while the Roseberry boys depended more on individual effort. The game was good to watch.

The line-ups were as follows:

Orbendale—M. Prosser, E. Prior, G. Coulman, W. Glover, F. Lukens, D. Mullens, F. Myers, W. Parsons, B. Prior.

Roseberry—C. Steele, Geo. Fischer, Murray Walker, Fred Younker, Tom Holt, Archie Cook, F. Ford, W. Lawson, E. Savard, Don Savard.

Referees—Herb Larson, John Goodwin.

Irma Juniors Trim Roseberry 6-1

The Roseberry hockey team again made the trip into Irma or Saturday evening, March 5th, to try and beat the Irma junior team. The ice was in good shape considering the damage done during the thaw the previous week. Both teams worked hard right from the start, but the Irma Juniors showed more than their opponents. The only goal the visitors got in the first period, shot from the side near the goal, in among several pairs of feet and finally glanced off Edward Savard's stick into the goal. The Irma lads were successful in bagging two goals during the first period. Before the game ended they had four more to their credit. R. Simmoner scored five, assisted with one. A. Carter scored one and assisted with three, while C. Jones assisted with two. The Irma Juniors are coming along fine. Several times the Roseberry players got right through for an open shot and failed to score. The Irma team was quite badly handicapped by being short one of their defense players. However after all it was well worth the admission price of 15 cents. Mr. R. L. Martin refereed the game satisfactorily, handing out only a few minor penalties.

Line-ups: Roseberry—C. Steele, G. Fischer, Murray Walker, Fred Younker, Tom Holt, Archie Cook, F. Ford, Bill Lawson, Ernest Oldham, Edward Savard, Don Savard.

Irma—C. Carter, H. Guitner, R. Congdon, C. Jones, R. Simmoner, A. Carter, R. Charter, D. Knudson, A. Sonne, P. Charter, D. McKay, N. McMillan.

Irma 7—Vermilion 4

While the Irma juniors were trimming their visitors the Irma seniors were playing all around the Vermilion team after a hard trip across country by way of Wainwright. When the game ended Irma had seven goals to their credit, while Vermilion only had four. This game too was won after being forced to leave one of their regular players at home due to illness.

The Gas Line league play-offs are about to commence, providing there is ice. This year it will be between Irma and Vermilion.

TENDERS WANTED

Marked sealed tenders will be received by the Irma School Board up to and including March 26th, 1938, for the position of Assessor. Lowest or any tender not necessarily accepted. For particulars see E. W. Carter, Secretary, Irma, Alberta. 11c

The individual's liberty to earn a living and provide for his dependents and successors is impaired in Canada by the fact that 20 per cent of all that he earns is taken from him by way of taxes."—Sir Edward Beatty, K.C.

The World of Wheat

By H. G. L. STRANGE
Director, Research Department, Scarle Grain Company, Limited

"The United States' Government has decided to release 100 million dollars' worth of gold every three months from the vaults where it has been 'sterilized' so as to permit the yellow metal to expand the credit base of the United States."

This is important news indeed, for

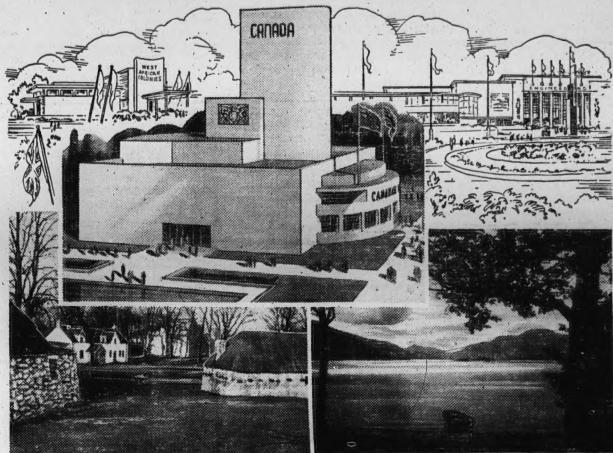

it means that the vast hoard of gold, which has been accumulating in the United States since 1933 will, at last, be permitted to make its weight felt in raising commodity prices.

As compared with 1913-14, the currency of the United States, Canada and Great Britain have been inflated by 69%, and since 1932 the World's production of gold has been about 40% greater each year than previously.

These factors, separately and together, tend greatly to increase the price of all commodities, for gold and money are the yardsticks which measure price. It means, therefore, that

"It is time to remove the current widespread contempt for the past."—Hon. Dr. Cyrus MacMillan.

Empire Exhibition to Make 1938 Scotland's Year

A last year, Canada and France, with the Paris Exposition, so 1938 will be all Scotland's and mostly Glasgow's, with the great Empire Exhibition which King George will open in the Scottish capital on July 8.

In the natural beauty of Bellahouston Park visitors will find the greatest show of Empire engineering and industry ever gathered into one place. Modernistic pavilions will house the exhibits of every Dominion and there will be palaces of engineering, the arts, industry to mention but a few. The big show will go on from there to see much of the rest of Scotland. Appropriately enough this year has been chosen by the Canadian Scot's Re-Union

as one of their periodical tours to the Empire, and it will end in a large party in the Duchess of Richmond from Montreal on July 8.

In the natural beauty of

Hidden Taxation

The recent announcement that the national revenues of Canada for the first two months of the current year showed an increase of more than \$66,000,000 over the same period a year ago, coupled with the assertion that each month's balance sheet brings the possibility of a balanced budget, leaves no doubt as to the cause for gratification, in Ottawa at least.

The same announcement also reported a decrease of nearly \$12,000,000 in expenditures for the same period; in other words a net gain to the budget of approximately \$78,000,000 and when revenues and expenditures were offset one against the other, a surplus of \$23,000,000 was shown, which, it was stated, may be wiped out by special heavy expenditures for relief and the C.N.R. deficit when the fiscal year ends on March 31.

A Proper Principle

From a strictly financial viewpoint, unquestionably, a balanced budget or, to go a little further, an excess of income over expenditure is a good thing whether it appears in the financial statement of a government unit, a private corporation or an individual. The principle has been recognized as a proper one for a long time. Charles Dickens, it will be remembered, pointed out the advantage, in terms of happiness at least, of an excess of revenue over expenditure, even if only a minute balance on the right side, when he quoted Micawber's now historic remark on the subject. If the principle of making both ends meet, or overlap a little, is sound in the case of the individual, it is equally sound in the administration of corporate affairs, private or governmental.

A surplus of revenue over expenditure is usually regarded as a hall mark of prosperity and the showing made by the Federal finances during the current fiscal year to date will undoubtedly be considered a symbol of financial recovery for the country as a whole.

Two Methods Of Approach

In governmental administration there are two roads which lead towards the goal of equilibrium between income and outgo. One of these is the path of reduced expenditures, the other, and sometimes the more easy one, is the broad road of greater revenues. The former is the real test of efficiency, so long as it is not carried beyond the point which would cause rejection, if the "penny wise, pound foolish" test were applied to it.

On the other hand governments are wont to congratulate themselves when the money tinkles in the cash register in increasing volume on the ground that it is a sign of increasing prosperity and prosperity, of course, they say, is due to the policies of the administration that happens to be in office at the time, which may or may not be true, or which may be only true in part.

Only One Source

It has been pointed out time and again, but the fact is often overlooked, that there is only one source of governmental revenue—taxation in some form or another. The money must come out of the pockets of the people ultimately, directly or indirectly. If money is flowing more freely into governmental coffers it is only because people are paying more taxes than before. It may be in the form of an increase in rates or a decrease in exemption of direct levies or it may be in the form of increased rates on indirect tariffs and charges on goods and services, or it may represent merely a larger volume of turnover of goods and services without any increase of taxation charges against them. It may be a combination of any two or more of these.

If analysis, where analysis is possible, shows that revenues represented by indirect taxation on commodities and services are increasing, due solely to a rising turnover in volume of business without changes in rate structure, then it can only be attributable to increased prosperity. If, on the other hand, increased revenues are not the concomitant of increased volume of business, but caused solely by increased prices of commodities, again without any change in rate structures, the figures may be a myth as a barometer of prosperity. In fact, they might be an index of the reverse, if it means that the taxpayers are contributing more towards the cost of government for the same amount of goods and services without a corresponding increase in the taxpayer's income to meet the additional charge.

An Element Of Guess

Unfortunately for the average taxpayer it is very difficult, if not impossible, for him to ascertain with any degree of accuracy what he is contributing towards the cost of government when it comes to indirect taxation. So far as he is concerned it is truly "hidden" taxation. Authorities may quote figures, and they frequently do, in an endeavor to enlighten him, but as these authorities invariably differ and their figures are at least partially based on estimates, the result is usually befuddlement.

Sometimes one is almost tempted to believe that it would be better for the taxpayer if all taxation were confined to the field of direct levies. It would certainly make the taxpayer tax-conscious if he knew exactly what he is contributing towards the cost of government.

Fire Started By Cat

And now it appears the family cat has to be taught along with the children, not to play with matches. For it was Oscar Phaneuf's cat that was blamed for setting fire to his home in East Angus, Quebec, causing damage to the interior. The cat, sipping at a box of matches, was blamed for the blaze.

WAKE UP LIKE A CAVE MAN

Feel Full of Life—No More Tired, Dull, Heavy Mornings

Keep your liver healthy and you'll feel great every morning. When you wake up feeling "rotten" your liver is out of order. Your liver is clear and full of power, separating the nourishing part of your food from the waste. Supplies energy to muscles, tissues and glands—gives out bile, the body's laxative, helps stomach, kidneys and intestines to do their work. Your body movement isn't enough. "Fruit-a-lives" made from fruits and herbs, will strengthen and build up your liver like nothing else will. You'll be amazed how well you are every morning. Try Fruit-a-lives. All druggists.

May Judge Plays

Celebrated Canadian-Born Actress May Adjudicate Plays At Winnipeg

Margaret Anglin, celebrated Canadian-born actress, may come to Winnipeg to adjudicate the finals of the Dominion Drama Festival the week of May 16. It is learned, Miss Anglin has been approached by festival heads on the matter, but so far a definite announcement of her appointment has not been made.

It was decided to have somebody from the United States to adjudicate this year's Dominion festival. Because English and French plays will be presented, the adjudicator must be a bilingualist. Col. H. C. Osborn, honorary director of the festival, recently visited New York and met Miss Anglin.

Keep your liver healthy and you'll feel great every morning. When you wake up feeling "rotten" your liver is out of order. Your liver is clear and full of power, separating the nourishing part of your food from the waste. Supplies energy to muscles, tissues and glands—gives out bile, the body's laxative, helps stomach, kidneys and intestines to do their work. Your body movement isn't enough. "Fruit-a-lives" made from fruits and herbs, will strengthen and build up your liver like nothing else will. You'll be amazed how well you are every morning. Try Fruit-a-lives. All druggists.

A pound of dried eggs is the equivalent of three or four pounds of frozen eggs.

FLIN FLOP

"The Story of Its Finding and Position To-day"

By PRATT KUHN

Last week we just started from Island Falls for Flin Flon in an outboard motor canoe—we continue our journey.

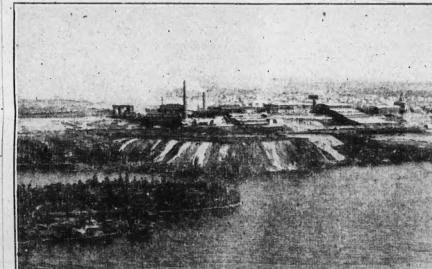

Another canoe, 24-foot, was equipped with a 14 h.p. Johnson outboard, attaining a speed of 12 miles per hour for the four miles across Muddy Lake. The next portage was over two miles, but here we found rails had cut and Pipe mouth gas locomotive pushed a flat car carrying the canoe and passengers across to Camp 6 where a 40-foot motor boat took us miles across Barrier Lake. Lunch was served on the boat and tea was made with water boiled on the manifold of the engine. I had with evaporated milk, ham sandwiches and preserved peaches as dessert. Potato tasted good. Reaching Camp 5 at the south end of the lake we portaged one mile again with a flat car. The next portage was over a cylinder gas yacht on Lake 6 that carried us to Camp 3, where we picked up the patrolman, an Icelander named Johnson, who had arrived, taking wet in the dock. We were luckily an hour late or he'd have missed us and we would have had to wait 20 or more miles. No second street car coming shortly out there!

He lived at Camp 38 but had just arrived on a patrol. Without time to speak to his wife, because he'd run out of boat coal, he grabbed a raincoat and his shiny axe and kit bag made the wharf to catch us. That day he'd seen moose and a black bear on his beat. He says moose are plentiful but it would be hard to get them out of the country. On we went 3½ miles, then portaged again 300 yards with tractor and wagon. This time we took a canoe, too, and putting on the flat board motor ran on to Camp 1 on Lake One. Another mile portage, and this time the tractor was being repaired, so we hitched ourselves to the straps of a wagon and pulled it, loaded with canoe and boys, over to Lake Mari,

Zinc Tank House. Man wears nose and mouth mask to avoid inhaling fumes. He is stripping the zinc in sheets from the cathodes which are made of aluminum at Flin Flon.

where a nice white yacht was waiting in the boat house equipped with a six-cylinder Russel gas engine. We telephoned from the boat house to Island Falls and were instructed to wait at a certain point where six fire fighters who were rushed up two weeks before should be ready to come out. Johnson had a patrol of 12 men at camp through Island Falls, which acts as Central, so the might know where he was. Boy—I'd like to get lost in a forest some time for a few days where phones can't catch up with me!

Note the developments in 1936. See the town in the background and how that dump has grown!

"Now that you are married," said the bride's mother, "I suppose you will take out an insurance policy?"

"Oh, no," replied the husband, "I don't think she's going to be dangerous."

30 MINUTES AFTER Eating-Drinking ALKALIZE

AFTER A HEAVY MEAL...

...AFTER A LONG EVENING

The fastest way to "alkalize" is to carry your alkalinizer with you. That's what thousands do now that generic Phillips' comes in tiny, peppermint-flavored tablets—in a flat tin for pocket or purse. Then when you are

use it this way. Take 2 Phillips' tablets—equal in alkaline effect to 2 teaspoonsful of liquid alkalinizer. At once you feel "gas," nausea, "over-crowding" from hyper-acidity begin to ease. "Acid headaches" and "acid breath" are overcome when you are content at the source. This is the quick way to ease your own distress—avoid offense to others.

Platinum In Alaska

Production Last Year Was Valued At Nearly \$242,000

Eleven years ago platinum was discovered at Goodnews Bay, off Bering Sea, by Charles Thorsen, a "sourdough" prospector. The working of deposits along certain streams by modern dragline excavators commenced in 1934, and by last summer operations had so increased as to merit the description of a rush. A bucket dredge was installed and is now in operation. Over 5,600 ounces of platinum, valued at nearly \$242,000, were produced last year in the new district, and indications are that this year production will be even larger. Annual world production rarely exceeds 300,000 ounces.

Dr. J. B. Mertle Jr., of the Geological Survey, found that the probable source of the Alaskan platinum is an elongated ridge, seven miles by two, called Red Mountain. The platinum placers lie in an area which was not in the path of large Ice Age glaciers advancing from the mountain region northeast of Goodnews Bay, and the deposits thus escaped being gouged out and carried away.

A new note in Science says that the deposits resemble geologically the rich placers of the Ural Mountains. Like the Russian deposits, the source rock contains insufficient platinum for profitable working, but the stream beds, where platinum freed from the source rock through millions of years of erosion has collected, can be dredged for the metal profitably. This year, unless the ponds freeze up too soon, the Diesel-powered dredge will scrap up nearly 20,000 ounces of platinum metals from the bed of Platinum Creek—New York Sun.

Proved Something

To show he was a better man than his wife read about, who ate 40 pancakes, Elmer Siebert, living near Lima, Peru, consumed 47 at one sitting. The pancakes were washed down with four cups of coffee, and several slices of bread completed the meal.

Johannesburg, South Africa, will spend \$6,700,000 to eliminate slums for natives.

Over 5,000,000 pounds of raw silk was produced in Italy last year.

New Pipe Line

To Be Built From Turner Valley Oil Field To Calgary

Construction of a six-inch pipeline from the Turner Valley oil field to Calgary, a distance of 45 miles, will be started immediately by the Royalite Oil Company, a subsidiary of Imperial Oil. It was learned.

W. S. Campbell, president of the Alberta Petroleum Producers' Association, advised officials of the association by telegram from Ottawa of Royalite's decision to construct the new line.

The present pipeline, a four-inch one, also operated by Royalite, has a daily capacity of 13,000 barrels.

Mr. Campbell also advised association officials the Royalite company had agreed to transport through its pipelines the oil produced by all companies, but that only the amount of oil allowed under the 42 per cent pro-ration schedule will be handled.

"Look here," said the indignant woman in the post office, "your mistakes are getting too bad. My husband has gone to Newcastle on business, and this morning I had a letter from him with a Brighton postmark."

Remember the big potatoes wouldn't get to the top of the heap if it wasn't for the little fellows at the bottom.

White: "How's your insomnia?"

Black: "Terrible. I can't even sleep when it's time to get up."

Nothing but the finest and purest ingredients are used in baking Christie's Biscuits, and infinite care is taken that they reach you crisp and fresh. What better Quality guarantee could you ask for than to ask for

Christie's Biscuits

"There's a Christie Biscuit for every taste"

YOU'LL be delighted with the simplicity of Presto-Pack—a flat pack of waxed paper for kitchen use. Just hang it on a hook or pull one sheet at a time as you require it. You can't pull any more because of the ingenious way it's packed.

Try Presto-Pack today. You'll find it the handiest thing in the kitchen.

FOLLOW VICKS PLAN FOR BETTER CONTROL OF COLDS

Full details of the Plan in each Vicks Package.

WHAT HO!

By RICHARD CONNELL

By Arrangement With Thomas Allen, Publisher, Toronto.

CHAPTER VI.—Continued

"Well, whatever you were doing, don't do," said the earl. "Call it jiu-jitsu or the tango or whatnot, the kitchen, just before luncheon is no place for it."

He nonchalantly helped himself to a plum.

"I'm extremely sorry, m'lud," said Crump. "If I may be allowed to explain."

"Explain away," said the earl, sitting down within reaching distance of the bowl of plums.

"I was going after a friend—

"Friend, Crump? Are there friends about?"

"Who but a friend would steal the body of Elaine?" asked Crump.

"Come, come, Crump," said the earl, "your friend has not the better of your good sense. I condole with you in the loss of Elaine—I was fond of her myself, y'know—but I ask you who would purloin a deceased pug?" It's not done, Crump. You must have mishandled her!"

"No, m'lud. She has been taken away. And I think I know the villain."

"Nasty hobby, stealing pugs," said the earl. "Who, in my household, has such deplorable taste?"

"I'd rather not say, m'lud. I suspect but cannot prove."

"It should be put a stop to."

"Yes, m'lud. And as it is, if I may say so, a personal matter, I hope you will—permit me to settle it in my own way."

"But surely not with that rolling-pin?"

Crump tossed the rolling-pin on a table.

"I'm afraid I was all of a do and dither, m'lud," said he. "Cook saved me from making a blithering chump of myself."

"Cool of Cook," said the earl. "And now, Crump, may I suggest that you postpone your efforts to solve this mystery until after luncheon?"

"Very good, m'lud. I am calmer now. My faculties have returned to me, thanks to Cook."

"If I may be of any assistance—offered the earl.

"Thank you, m'lud; but I think I can handle this matter better alone."

"You'll be temperate, Crump?"

"Yes, m'lud."

"Discreet?"

"Yes, m'lud."

"Tolerant of human foibles?"

"Yes, m'lud."

"No rolling-pins or other blunt instruments, eh?"

"No, m'lud."

"Including fists?"

"As to that, m'lud," replied Crump. "I cannot say positively. I shall endeavor to curb my emotions, but I find that sometimes— he cast a fleet, tender glance at the cook—they run away with me. I promise to do my best to be tactful and pacific—but—"

"I understand," said the earl. "If, Crump, your emotion should run away with you to the extent let us say, of one medium-hard smack on the proboscis, no official notice will be taken of the incident."

"Thank you, m'lud."

"I hope," said the earl, "that luncheon will be ready soon. Putting always gives me a dormitory's appetite. I could gobble a roast gorilla stuffed with pygmies."

"We have cutlets and gooseberry tart, m'lud," said Mrs. Featherby.

"Splendid. Just have Sloat round up Mr. Bingley and we'll have at those cutlets."

"But when Sloat, saved for the nonce, from chastisement, went to summon Ernest, he could not find him. A meticulous search of the castle and grounds, including a pag-

ing of the dungeon, failed to locate the tenant. Willy-nilly, the earl and Lady Rosa sat down to luncheon without Ernest.

"Wandered off somewhere, I suppose," said the earl. "He's such a jack-in-the-box. Always popping in and out. He was helping my pot this morning, and, whoosh—he vanished. I must say, though," added the earl, "that he pots a pretty garment."

"I do hope nothing has happened to him," said Rosa.

"This is England, my dear," the earl reminded her. "The worst thing that can happen to a nice young man here is unrequited affection. We've crack-pots galore on this island, but singularly few geegaws, crooks, and banditti. Our habit of hanging them discourages them. So don't worry about Ernest. A chap who is a match for any one he may meet in the lanes of Somerseshire."

"Have you heard anything further from Punder?" asked Rosa.

"Not even a post-card from Brighton, wishing I was there," replied the earl, "but why mention Punder? He doesn't go well with cutlets."

"He's on my mind," Lady Rosa.

"Get him off at once," advised the earl. "He's just a lot of bluster."

"I don't think so, father."

"Forget the big barnacle," said the earl. "Let us talk of pleasanter things. Ernest, for example. You like him, don't you, Rosa?"

"Yes, I do. He's been so considerate. And I like his imagination. Of course, a modern young man who sometimes thinks he is back in medieval times, and behaves as Ernest often does, must have March hares in his hutch; but I never did like men who are so sane as they are dull."

"I take that as a compliment," said the earl, with a bow.

"You, father," laughed Rosa.

"To return to Ernest. His instincts are right, but he is amazingly naive."

"Hate sophisticated people myself," said the earl. "They are so blooming sophisticated."

Crump came in.

"Captain Duff-Hooper to see you, m'lady," he announced.

"Ask him to wait in the library, will you, Crump?"

"Tell him I won't keep him waiting long. It'll take me about ten minutes to slip into my riding clothes."

"Yes, m'lady."

"Hey, wait," said the earl, as Rosa prepared to leave. "Aren't you going to finish your tart?"

"Sorry. Haven't time," she said.

"You know how Esme fumes and fusses if he's kept waiting."

"I do," said the earl. "One of his less amiable traits. Take the tart with you."

"Sound idea," said Rosa, and did so.

Ernest did not appear until dinner time, and he was late for dinner at that.

"I'm very sorry," he apologized, as he entered, with the roast, "but I had to go to Bristol on business."

"Quite all right, Ernest, quite all right," said the earl, helping him to a cut from the joint. "Stock market very jumpy, eh?"

"Busy with the bulls and bears, I suppose."

"Yes, sir."

"I never can remember which is which," said the earl. "Let me see now—the bulls gore the lambs, and the bears claw 'em. Is that right?"

"Yes, sir," replied Ernest, though he was not at all sure himself.

"I wish," said the earl, "you'd explain the workings of Wall street to me, in simple language. I mean to say."

"Father," said Rosa, "can't you see that Ernest is tired?"

"I'm not exactly tired," said Ernest.

"Splendid. Then perhaps you won't mind answering a question or two," said the earl.

"I'll be glad to," said Ernest, "if I can."

Privately he had grave doubts that he could answer any question relating to finance.

"Fellow called on me to-day to sell me shares in Afro-Anglo-Paraco Rubber," said the earl. "Of course, I have no money to invest, but I might have one day and I'd like to know what you think of the company."

"Afro-Anglo-Paraco Rubber, did

you say, sir?" said Ernest, playing for time.

"Right."

"I am of two minds about it," said Ernest, trying to look astute. "One says 'yes'; the other says 'no'. The stock has its merits; but it also has its defects. Under certain conditions, it is a good buy. Under other conditions, I should not advise its purchase. Of course, you understand I am not a rubber man—"

"Aren't you?" asked the earl.

"No. You might call me an oil man, or a steel man or a wool man, but not a rubber man," said Ernest, and his desperation deepened. "Once I was a copper man and a leather man, but I never was a rubber man."

"I'll make a note of that," said the earl. "About that stock now, do you think—"

"Screams from the kitchen cut short, his question.

"Cook shouldn't scream like that," said the earl. "Crump, find out what is happening out there."

But Crump did not reply, for Crump was not there.

The shrill sounds continued.

"I shall have to look into this," said the earl, and he sauntered out to the kitchen.

"I'm going, too," said Ernest. "It might be burglars."

He followed the earl, and Lady Rosa followed him.

The sounds came from Mrs. Featherby, who was sluicing water on the prostate form of Crump.

The earl felt Crump's pulse in a businesslike way and said,

"He's fainted, that's all. He does that sometimes. Cook, some brandy. And stop that cat-crawling."

"Yes, m'lud," she said.

She brought the brandy. As the earl administered it to Crump, he asked,

"What did you do to him, Cook?"

"I'm m'lud?"

"You."

"Nothing, m'lud. I was busy getting the treacle-sponge ready to serve when he comes white as rice, hollers 'Spooks and falls in here'."

The earl poured a second dose of brandy into Crump, who stirred and opened his eyes.

"Where am I?" he asked faintly.

"Safe and sound on the kitchen floor," said the earl. "And quite unharmed. Take it easy, Crump. You'll be all right in a minute."

(To Be Continued)

The Right Approach

One Man Succeeded In Selling Dog Where Others Failed

A city man owned a very fine thoroughbred Scotch Collie dog. The owner wished to sell the dog and offered it to an old farmer he thought would appreciate its high qualities. He described in detail the dog's beautiful coat of hair, his markings, his pedigree, and the long list of prizes he had taken at various dog shows.

The old farmer grunted and said he did not want a dog.

Then the city man turned his dog over to a friend to sell. The friend went to see the same old farmer. He asked the farmer about his rheumatism and asked him if it ever troubled him when it came to running after the cows at night. The old farmer admitted it had. Then he asked the farmer if he had lots of rats. Yes, he had and they were getting to be a terrible nuisance.

And then came the matter of a watchdog. So the man asked the farmer, now that he was getting old, what special precautions he had taken to protect his property. Lots of night prowlers around; wouldn't a watchdog be a good thing to have on the farm?" The farmer readily agreed.

Then the man said: "I know where there's a dog who will drive in the cows, catch the sheep, kill every rat on the place, and be alert and watchful at night."

The old farmer didn't wait for him to finish, but said, "Where in the world can I get that dog? That's just what I need." In two minutes the sale was made—London Life Topics.

Must Have Broad Vision

"Canada is too big for little Canadians," said Col. G. W. Peacock, of the Salvation Army, at a Kiwanis Club luncheon in Toronto. He said Canadians must be big and broad in vision and but more so in their views. "We must see the good in all," Peacock urged by Col. Peacock.

Leading aircraft manufacturers of England expect to operate at capacity until 1940.

I'll be glad to," said Ernest, "if I can."

Privately he had grave doubts that he could answer any question relating to finance.

"Fellow called on me to-day to sell me shares in Afro-Anglo-Paraco Rubber," said the earl. "Of course,

I have no money to invest, but I might have one day and I'd like to know what you think of the company."

"Afro-Anglo-Paraco Rubber, did

you say, sir?" said Ernest, playing for time.

"Right."

"I am of two minds about it," said Ernest, trying to look astute. "One says 'yes'; the other says 'no'. The stock has its merits; but it also has its defects. Under certain conditions, it is a good buy. Under other conditions, I should not advise its purchase. Of course, you understand I am not a rubber man—"

"Aren't you?" asked the earl.

"No. You might call me an oil man, or a steel man or a wool man, but not a rubber man," said Ernest, and his desperation deepened. "Once I was a copper man and a leather man, but I never was a rubber man."

"I'll make a note of that," said the earl. "About that stock now, do you think—"

"Screams from the kitchen cut short, his question.

"Cook shouldn't scream like that," said the earl. "Crump, find out what is happening out there."

But Crump did not reply, for Crump was not there.

The shrill sounds continued.

"I shall have to look into this," said the earl, and he sauntered out to the kitchen.

"I'm going, too," said Ernest. "It might be burglars."

He followed the earl, and Lady Rosa followed him.

The sounds came from Mrs. Featherby, who was sluicing water on the prostate form of Crump.

The earl felt Crump's pulse in a businesslike way and said,

"He's fainted, that's all. He does that sometimes. Cook, some brandy. And stop that cat-crawling."

"Yes, m'lud," she said.

She brought the brandy. As the earl administered it to Crump, he asked,

"What did you do to him, Cook?"

"I'm m'lud?"

"You."

"Nothing, m'lud. I was busy getting the treacle-sponge ready to serve when he comes white as rice, hollers 'Spooks and falls in here'."

But Crump did not reply, for Crump was not there.

The shrill sounds continued.

"I shall have to look into this," said the earl, and he sauntered out to the kitchen.

"I'm going, too," said Ernest. "It might be burglars."

He followed the earl, and Lady Rosa followed him.

The sounds came from Mrs. Featherby, who was sluicing water on the prostate form of Crump.

The earl felt Crump's pulse in a businesslike way and said,

"He's fainted, that's all. He does that sometimes. Cook, some brandy. And stop that cat-crawling."

"Yes, m'lud," she said.

She brought the brandy. As the earl administered it to Crump, he asked,

"What did you do to him, Cook?"

"I'm m'lud?"

"You."

"Nothing, m'lud. I was busy getting the treacle-sponge ready to serve when he comes white as rice, hollers 'Spooks and falls in here'."

But Crump did not reply, for Crump was not there.

The shrill sounds continued.

"I shall have to look into this," said the earl, and he sauntered out to the kitchen.

"I'm going, too," said Ernest. "It might be burglars."

He followed the earl, and Lady Rosa followed him.

The sounds came from Mrs. Featherby, who was sluicing water on the prostate form of Crump.

The earl felt Crump's pulse in a businesslike way and said,

"He's fainted, that's all. He does that sometimes. Cook, some brandy. And stop that cat-crawling."

"Yes, m'lud," she said.

She brought the brandy. As the earl administered it to Crump, he asked,

"What did you do to him, Cook?"

"I'm m'lud?"

"You."

"Nothing, m'lud. I was busy getting the treacle-sponge ready to serve when he comes white as rice, hollers 'Spooks and falls in here'."

But Crump did not reply, for Crump was not there.

The shrill sounds continued.

"I shall have to look into this," said the earl, and he sauntered out to the kitchen.

"I'm going, too," said Ernest. "It might be burglars."

He followed the earl, and Lady Rosa followed him.

A Piece of Cloth

CLOTH is very old. It is as old as man-made fire or man-made shelters. It is older than pottery. No matter how far back into mankind's earliest beginnings the professors of history may search, they find that cloth is even older than history.

ALL DOWN THE CENTURIES, people the world over have spun and woven cloth. They made it in China, in the Nile Valley, in ancient Greece. The Indians of our continent produced very good cotton and woolen cloth.

TODAY in Canada we make excellent cloth. The textile industry furnishes employment to one out of every five industrial workers in this country. In 2,234 textile establishments, 115,000 men and women have steady jobs, year in and year out, winters as well as summers. The goods that they make form 13 per cent. of our total industrial production.

DOMINION TEXTILE COMPANY has been making cloth since the early part of this century. A Canadian company, financed by Canadian money, employing Canadians in six towns of Quebec province, this company feels that the cloth which it weaves is the equal of any produced in the long history of this ancient art.

**WISE AND OTHERWISE
WISE-CRACKS**

By Alberta Editors

HARDY WORLD—The Main street is taking on a real sprightly appearance these days and the traffic has been slowed down considerably. But March was ushered in quietly, so this may be only a false alarm.

w w w

ST. PAUL JOURNAL—Several young folks, including the writer, were lustily singing in a cafe Thursday evening. A policeman had to tell us to quiet twice! No, we were not drunk, just young.

w w w

LACOMBE GLOBE—Ever since the present government was elected to power, the business men of this province have demanded, asked, begged and hoped for the inception of a sane, businesslike budget and the scrapping of these social credit theories.

w w w

CASLOR ADVANCE—We are wondering if the Caslор Board of Trade are contemplating taking this question of electric light up, the same as other towns, and getting information necessary, and see if our little town is being discriminated against with other towns.

w w w

OLDS GAZETTE—H. J. Ash, M. L. A. for this constituency, was the mover of the motion to increase the sessional indemnities of the members \$200. We always did have faith in Mr. Ash and that sooner or later he would be heard in the legislature.

w w w

HANNA HERALD—Before the election Premier Aberhart said there would be no increase in taxation. With what muckrakers must sincere people read the latest budget, in the face of this solemn promise. Taxation is now at the peak and will increase still further, with the continuance in power of this promise-breaking government.

w w w

VEGREVILLE OBSERVER—The abolition of poverty in the midst of plenty proceeds apace in our Alberta legislature, where the members are about to help themselves to another \$200 per year additional sessional indemnity. Everybody gets a slice of the mutton, even the cabinet ministers, already far overpaid, sharing in the good things provided by Santa Claus Solon Low.

By jingo; these lads have no intention of ever getting on the relief lists, which were so amiably hinted at by Mrs. Edith Gostick, M.L.A. The two Ediths, Gostick and Rogers, can now order their Easter millinery with light hearts.

w w w

INNISFAIL PROVINCE—At Edmonton this week the budget has been brought down and it provision has been made for an increase in the indemnity of the members of the legislature, sixty-three in all, amounting to \$200 each, bringing their salaries up to \$2,000.00 per year or per session of two months.

This would lead us to the conclusion that instead of the phrase "Poverty in the midst of plenty", Mr. Aberhart and his followers should adopt the phrase "Plenty in the midst of poverty."

w w w

RED DEER ADVOCATE—There is neither encouragement nor disappointment in the budget except to those who still had some faint hope that this government might at long last do something to implement its lavish promises. Evidently the government is still "pressing on". The increases in taxation will be borne by the citizens of the province with varying degrees of resignation, and its provisions will be severely criticized during its passage through the House. History is not made by budgets like this, nor is Social Credit brought any nearer.

w w w

LONDON DAILY MIRROR—William Aberhart is the Prime Minister of Alberta. Mr. Aberhart has, by his system of economics, got Alberta into the most frightful mess. You may recall that he is the gentleman who proposed to give away five pounds a month to every adult in the State. Well, now that things are rather awry many folk have up and started calling their Prime Minister a lot of rude names. Was he worried? Not he! With celestial calm he announced: "I had no ambition at any time to be Premier, but I believe God wants me to occupy my present position, and I shall not be moved by any other consideration."

**HON. R. B. BENNETT QUILTS
CONSERVATIVE LEADERSHIP**

Ottawa, March 5.—Rt. Hon. R. B. Bennett Saturday asked the national Conservative conference here to revere him of the leadership of the party.

Mr. Bennett said he would carry on until a national convention of the party was held, probably in the late spring or early summer of this year.

**SOCIAL CREDIT ACT AND OTHER
ACTS DECLARED UNCONSTITUTIONAL
BY SUPREME COURT**

By C. H. STOUT

Edmonton, March 8th.—The water that runs under the bridge has been left far behind by the words that have poured across the face of this social credit province and beyond since the supreme court of Canada ruled last week that the Dominion has the right of disallowance over provincial legislation, and that the bank taxation and control bills, and the measure to curb newspapers, enacted by the legislature last September, were unconstitutional.

Probably more staggering even than these decisions was the opinion of Chief Justice Sir Lyman Duff that the Alberta Social Credit Act, under which the social credit board functions, was itself ultra vires. It is hard to see by what means any further expenditure by the board can be legalized. It may not be possible for the Lieutenant-Governor to sanction the vote of \$100,000 to the board for 1938, submitted in the estimates, even if the legislature majority endorses the item.

Naturally Premier Aberhart and his government were put in a bad spot by the verdict. Provincial treasurer Solon Low in his budget speech ventured the hope that a tax of \$2,000,000 expected from the banks would offset the \$500,000 deficit of 1937 and the \$1,500,000 deficit expected for 1938. Rumors are prevalent to the effect that the government has "a couple of shots in the locker" as a final blast for a new credit system, but what these proposed schemes are has not yet been revealed. In any event any further unconstitutional legislation would only aggravate the situation and make an appeal to the country almost inevitable.

At this distance it would appear that the social credit strategists probably will make the next election issue that of provincial rights versus the rest of Canada. Portents of this campaign issue already are much in evidence. The federal cabinet will be held up as the big bad bogey that prevents any changed social order being established in Alberta.

**Liberals Are Leading
Way To Recovery**

Liberals principles are bringing recovery and reform to Canada, R. C. "Bob" Marshall, Liberal candidate in the East Edmonton by-election, asserted at the rally on his behalf Saturday night in the Empire theatre. He pledged himself to work with all his ability and strength so that that program might be pushed ahead and the lot of the common man bettered. "Canada is on the march," Bob Marshall declared, "and Prime Minister Mackenzie King is at the head of the parade."

"The Liberal party is bringing Canada out of its economic troubles which have shadowed it for the past few years, and is going about solving our problems in a reasonable and constructive way," he added.

Margarine, or other substitute for butter, is prohibited in Canada, in contrast to Germany which produced 417,000 tons of margarine in 1936. The United Kingdom with 181,000 tons, and the United States with 176,000 tons were the next largest producers of this substitute for butter in 1936.

If You Cannot Call In Person:**BANK BY MAIL**

Although we have 500 branches, you may not find it convenient to come to the Bank to transact business. You can do your banking by mail. Thousands of our customers make deposits and withdrawals by mail. The process is simplified by the convenient forms which the Bank supplies free of charge. One enthusiastic mail-customer writes:

"Please accept my sincere appreciation of the careful and conscientious manner in which

your Bank is handling my family's accounts. They are not large but if there were a million in each they could not be looked after better, and it makes banking by mail a pleasure."

**Who Owns
the Assets of
Life Insurance
Companies?**

Answer.—These assets are jointly owned by more than 3,500,000 policyholders—men and women who constitute one-third of Canada's population.

Question.—What is the average share of each policyholder in these assets?

Answer.—About \$571. This shows that Life Insurance assets are made up of the savings of millions of thrifty men and women.

Q.—What is the nature of Life Insurance funds?

A.—They are trust funds held by the Life Insurance companies to pay policy claims as they fall due.

Q.—How are these funds invested?

A.—In loans to governments and municipalities—for building homes and schools—for improving farms—for constructing good roads and transportation systems—for developing industries and public utilities.

Q.—To what extent does Alberta share in such investments?

A.—More than Ninety Million Dollars of Life Insurance funds are invested in this Province.

This is the third of a series of messages, sponsored by Life Insurance Companies operating in Canada. The fourth, to appear in two weeks' time, will discuss Life Insurance investments.

Which Variety Shall I Use?

Many farmers are asking themselves this question.

It isn't easy to decide.

One piece of advice, however, may be given. By all means use a few bushels of high quality butter. Registered seed of whichever variety is decided upon. This will certainly increase any farmer's income.

See the nearest **SEARLE** or **HOME** Agent for good seed at a reasonable price.

SEARLE GRAIN COMPANY, LIMITED

CANADA'S CHARTERED BANKS VALUE YOUR GOODWILL

★ ★

WHETHER you deal with a bank or whether you don't, some time soon—say the very next time you are passing the bank's door—why not drop in and get acquainted? You're sure of a welcome, because the bank manager wants to know you. So find out for yourself what kind of fellow he is. And before you leave, take a good look at his staff.

The head offices are manned and managed by just that sort of man! Every general manager in Canada started in the banking business as a junior in some small branch, and rose from the ranks.

{ This is your introduction to a series of chats in the course of which you will be surprised at how little of mystery and how much of service there is in the business of banking in Canada. }

Canada's chartered banks want your goodwill.

It is only by goodwill that bankers make a living—and bankers are your fellow-citizens, the same sort of people as you.

Of course bankers have heard all the old, threadbare jokes about the banker's glass eye, his delight in humiliating worthy souls who ask for loans—even though he's been chequed about lending the umbrella when the sun is shining and taking it back when it rains.

So if you think you have a new joke, drop in and spring it on your local bank manager—he'll appreciate it. And if it turns out he's heard it before, he'll still have his sense of humour handy enough to get a chuckle, should you chance to tell him that the banks are being held responsible for the last storm, or for the loss of the hockey game, or for his own neglect to summon prosperity from just around the corner.

Which should prove to you that your banker is, after all, a very human person. He likes people. All bankers like people. And they want people to like them.

Banks want to be helpful. They realize that they succeed only as the people of the community succeed. Enlightened self-interest? Well yes—but not altogether.

Your local manager will tell you that banks are not stiff-necked; that they do not enjoy refusing loans.

They'd be foolish if they did, for goodwill is the whole core and pitch and substance of successful banking.

THE CHARTERED BANKS OF CANADA

Your local branch bank manager will be glad to talk banking with you. He will be glad to answer your questions, from the standpoint of his own experience. The next article in this series will appear in this newspaper. Watch for it.

Free Lending Libraries

Are being placed at one line country elevator in the towns, villages and hamlets throughout the areas of Western Canada which have suffered crop failures as a result of lack of rainfall in recent years. These libraries, which owe their initial inception to Her Excellency The Lady Tweedsmuir, are made possible through the joint efforts of the Association of Canadian Bookmen and other public spirited organizations and citizens throughout Canada. The North-West Grain Dealers' Association has made itself responsible for the expense of housing, distribution and circulation of the books.

Members of families, regardless of which elevator system or company they patronize, may obtain the loan of books from this library without charge. When the books in a library have served the needs of a community another unit will be moved into the district.

If your community has not yet received a library, and you desire one, communicate with your line elevator agent or write to

Viking News Items

Spring flowers and white wedding bells intermingled in an attractive setting for the wedding Sunday of Miss Sophie Ratner, daughter of Mr. and Mrs. J. Ratner of Grondid, Sask., and Mr. William Comisarow, son of Mr. and Mrs. M. Comisarow, of Stony Plain, which took place in the west-end home of Mr. and Mrs. A. Fratkin, sister of the bride, Edmonton.

For the ceremony, which was performed by the Rev. Rabbi Haft, the bride wore a coral taffeta gown, a coral shoulder-length veil and a coronet of French flowers. Her bouquet of roses and lily of the valley was fastened to her prayer book.

Mr. and Mrs. F. W. Fish announce the marriage of their second daughter, Margaret Estelle, to Edward Mitchell, son of Mr. and Mrs. O. Fitzmaurice, of Viking, Alberta.

Rev. A. K. McMinn, of McDougall United church, officiated at the ceremony which took place on February 2nd in Edmonton.

A charming wedding was celebrated in the social room of the First Presbyterian church, Edmonton, on the afternoon of Saturday, March 5, when Miss Vera May Elizabeth Speers, eldest daughter of Mr. and Mrs. Alec Speers, became the bride of Mr. Donald Reuben Swift, second son of Mr. and Mrs. T. W. Swift, of Viking.

A league scheduled game was played on local ice Friday night, when Holden took the Viking team to town to the tune of 6-2. The game was fast, with plenty of thrills and frills, and many sensational rushes by Rasmussen.

The first period was fast, with one goal scored on each side. The puck was put in just after the "time" and the goal was not counted.

The second period was just as fast as the first, with Holden boys scoring two, while Viking did not score at all.

The third period was also fast with Holden still scoring. About half way through a fight was started resulting in penalties for G. Ash and Edworthy.

Viking was playing all men up with Rasmussen on defence. He made two sensational rushes resulting in Beckett scoring on a pass from A. MacEachern who received it from Rasmussen.

A number of young friends were guests of Don Rollans on Monday after school to enjoy with him the celebration of his twelfth birthday anniversary. Games, contests and a real delicious lunch were the highlights of the occasion. Boys present were Junior Broughton, Ian Armstrong, James Taylor, Walter Marlow, Bill Gillespie, Norman Phillips, Don Stafford, Alfred Rosen, Lee Chiswell, Lindsay Thunell, Billy and Don Rollans.

The death of Most Rev. Archbishop O'Leary, of Edmonton, occurred in Victoria on March 5th, at the age of 58 years. His passing is mourned by friends of all denominations. He was a kindly generous man devoted to his high duty. Many in this community will remember his pastoral visits to Viking on several occasions. The funeral will take place in Edmonton on Friday at 10 a.m. at which time Pontifical Requies. High Mass will be celebrated in St. Joseph's Cathedral. Requiescat in Pace.

The Harmony Quints are playing for a dance after the show on March 18th. Come and enjoy dancing to the music of this peppy orchestra from Holden.

Word has been received of the death of L. F. Sherrin, at the age of 71 years, in Edmonton. The late Mr. Sherrin conducted a hardware store in Viking about twenty years ago, later moving to Ferintosh. He has resided in Edmonton during the past ten years. He leaves to mourn his loss, his wife, two daughters and one son.

Starting April 6th, stores and local business places will close on Wednesdays at 12:30 noon, during months of April, May, June, July and August.

Considerable interest is taken locally in the radio broadcasts by Dr. G. M. Little, medical health officer for Edmonton, formerly practicing in Viking.

Miss Eleanor Goodwin left for Edmonton last week where she is a nurse in training at the Royal Alexandra hospital.

Mr. T. E. Tanner, of the Calgary Power Co., purchased a new 1938 Plymouth sedan from Taylor's garage this week.

Horace Rollans was in the hospital a few days recuperating from an attack of the "flu." We are glad to report that he is doing nicely.

People are asking what is the enlarged school area board doing. Minutes of their meetings will be published if received at this office.

The annual meeting of the Viking curling club will be held in the Viking hotel on Saturday, March 12th. Following a banquet that starts at 7 p.m., the business meeting will be held. All curlers and others interested in curling are urged to attend. Tickets 50c.

SPORTS

By H. B. C.

In curling there is an occasional shot that appears beyond explanation. In a game with Percy Main in the local bonspiel, Ken Hilliker put a rock through a port, took out Percy's shot rock and lay five. One of the players took another rock and tried to steer it by hand through the same port, and found it impossible. Did Ken make this rock jump over or dive under? Or was his rock slightly smaller? Maybe it was something like that. Hindu rope trick, where the boy climbs an imaginary rope into the clouds, the fellows just imagined they saw Ken do that, while he had them hypnotized.

The popularity of the gilder is increasing, as clubs are forming in all parts of the world and information and instruction is available. One admires the hawk soaring aloft with no apparent movement of the great wings. A gilder in the hands of a skilled operator will rise four or five thousand feet and travel great distances, with no power but that of the wind striking his sail-plane. This game of playing bird must be great fun and fearfully exciting.

The Dominion Curling Association reports a membership of 24,000. Of course that does not include all the curlers, only those who have paid in the fee. Possibly there are twice that number who play. Our long winters are suited to this game and Canadians have developed great skill in this group sport. Quite often it takes the whole four men to make a perfect shot, or spoil what might have been perfect. It is the combination that counts, perfect harmony proving essential. A little discord ruins the best individual efforts.

A golf game in England that last ed 16 years ended last week with the death of George New. Every Thursday he and W. R. Chamberlain played 18 holes, and agreed to continue the contest "to the death."

Just after England announced that Wooderson covered the mile run in 4:06.4 along comes the U.S. with a new record for their man Cunningham, 4:04. The latter says that he expects someone will eventually hit the four minutes. That would mean travelling at 22 feet per second all the way. Looks impossible.

Just after England announced that Wooderson covered the mile run in 4:06.4 along comes the U.S. with a new record for their man Cunningham, 4:04. The latter says that he expects someone will eventually hit the four minutes. That would mean travelling at 22 feet per second all the way. Looks impossible.

"Unemployment should always be above politics." — Premier Maurice Duplessis.

"Democracy today is being challenged and if democracy is to survive as a form of government, men and women must give the best of their organized effort to maintain that democracy." — Rt. Hon. R. B. Bennett.

Conservation and Reforestation

"Twenty-five per cent. of land should be forest, if water supply is to be preserved, purified and regulated."

The foregoing is an extract from a lengthy article in a recent issue of *Toronto Saturday Night* penned by E. Burnham Wyllie, in a strong appeal for a vigorous national policy for conservation of the existing timber wealth of the country and for a permanent and progressive policy of reforestation to replace depleted resources.

While the writer makes his comment particularly applicable to conditions in Ontario and the Maritime provinces, the subject is of more than passing interest and importance to Western Canada in view of the effect of denudation of timber upon the future of agriculture.

Important Influence

It is true that the ability of stands of forest to draw precipitation is a controversial topic among experts but there is no gainsaying the statement that forests can and do exert an important influence in conserving moisture that actually falls to the benefit of field crops, livestock and every other branch of the agricultural industry. Practical farmers have observed this and again that snow which has been held by trees and even fences has in dry years spelled the difference between a good crop and a poor one, or between a fair crop and none at all within the area influenced by such trees or fences. Similarly, it should be generally understood by this time, that even a few trees exert an influence on the retention of summer moisture within a limited contiguous area, to say nothing of their value in tempering high winds to neighboring crops for the shelter of livestock, prevention of soil erosion and insurance of a permanent supply of timber for fuel, construction and other industrial purposes.

All of these and other aspects of the question of conservation of forest resources and reforestation are dealt with in Mr. Wyllie's enlightening contribution and he quotes freely Canadian and United States authorities in support of his general contention that "we know to-day that agriculture is frightfully handicapped as forests are stripped from the land."

Little Protection Here

If 25 per cent. of the land under tree growth is a proper balance, as Mr. Wyllie says, then very large sections of the Canadian west are far short of this requisite protection, for the agricultural industry and other trees, which a few years ago harbored substantial stands of trees, will fall into the same category, sooner or later, unless a sound policy of conservation reforestation is adopted. It is aptly pointed out that a tree which has taken many years to grow can be cut down in an hour or two or perhaps even in a few minutes.

Even in some sections of Ontario, regarded by westerners as a well-treed country, and at one time clad with dense forests, timber has been depleted to such an extent that less than five per cent. of the land has even scrub tree growth, with the result, to quote Mr. Wyllie, "wells fail, streams dry and pasture withers when the forests have gone."

As far back as 1922, E. J. Zavitz, now Ontario's chief forester, is quoted as stating that "at the present rate of cutting the stand of pines in the Laurentians which took centuries to grow, will be exhausted within 20 to 25 years," indicative of the extent of the slaughter of these once great forest reserves.

It is important and interesting to note that not only does the absence of trees enhance drought conditions in semi-arid country but also is responsible for floods in periods of heavy rainfall, if Mr. Wyllie's diagnosis is correct, and there is plenty of authority to support him.

Damage Is Result

"Where forest trees have been consumed from slopes and plains the land is left without a natural umbrella to break the force of heavy rainfall," says this author. "The downpours scathe the land, carrying topsoil in drifting muddy floods into streams beds incapable of holding the new volumes of freshet waters plus the washed down soil—result, the devastating floods that caused more than twenty-five million dollars in damage to homes, bridges and embankments last spring."

The Western provinces and many countries in the East are faced with the necessity for costly schemes to retain soil erosion that has reached threatening proportions. Had the western people planted forests as well as wheat, there would be no drought problem in the west to-day in anything like the devastating threat that now means the depopulation of vast reaches of western lands and the terribly costly relief bills to be met annually."

Principles Sound

While Mr. Wyllie may have exaggerated the extent of the area which may have to be depopulated, nevertheless his view of the underlying principles of the value of conservation of forest resources and reforestation as sound in Western Canada as in the east and is worthy of serious reflection in the interests of the future of the principal industry of the prairies.

There are other arguments in support of a progressive policy of reforestation and conservation, as for instance the effect of denudation of trees on the wild game and fish resources of the country and the aesthetic value of trees which could well be expanded were space available.

An Altitude Record

Free Balloons From U.S. Weather Bureau Ascend 82,600 Feet

Altitude records for free balloons was established in Boston recently when the United States Weather Bureau had one of its radio balloons sent up from the airport to record temperature in the upper air. An altitude record of 82,600 feet, approximately 15½ miles, was established. The temperature recorded was 50 degrees below zero.

MANY folks are thin and pale—they're weak, feel tired, lousy and dull. This condition is often overlooked.

Dr. Pierce's Golden Medical Discovery is a tonic which stimulates the body, eliminates waste from the system, and tones up the digestive system. Read more about it in the following.

Branding was a legal punishment years ago, but often it was only a formality, with a cold iron being used.

When a girl seeks some way to pass the time she seldom looks in the kitchen.

The Sahara desert is a tableland with a mean elevation of 1,500 feet and has mountains 9,000 feet high.

Hardest thing we ever did was making ten easy payments. 2244

FLINFLON

"The Story of Its Finding and Position To-day"

By PRATT KUHN

Last week we were looking for a gang of fire fighters—here's the outcome of our search.

We found the men, and as they saw us they struck camp, packed up tent bags, etc., and carried pump, tools, etc., on board within 15 minutes. They had succeeded an hour before in finishing off a fire that got into the muskeg and burnt the log cabin of a man who had been the most wretched and tired out. Tobacco had given out and some old timers smoked Kinnikinnic, which is the inside bark of red willow, which grows in the muskeg.

Further down the lake we stopped to let Johnson out and pick up his mate. There's a telephone in a heavily protected box at this point, and a regular small wharf. The patronizing log cabin is 13 miles completed his trip and was now hitching back to save the walk.

When we reached the end of Lake Man we transferred to an electric locomotive that took us one mile and transferred us to the regular sand train for Flin Flon, eleven miles away.

Riding in the tremendously powerful C.P.R. locomotive we were having eighteen cars, each weighing 44 tons and loaded with 32 tons of sand or 616 tons without the engine.

Finally we hauled a block from the hotel at 11:10 p.m. We started at 8:45 a.m., travelled perhaps 80 miles and took 14½ hours, against 40 minutes going up. Do you wonder the north uses planes everywhere? And, moreover, the men travelling in comfort beside the prospector who has to paddle his canoe, portage it and all his goods on his back?

Let me tell you of the floating islands that sometimes appear. One came down in the summer of 1932 that was a quarter acre in area and ten feet thick with trees on it six inches in diameter.

Of course, the double booms in front of the intake gates stopped it but it took some manoeuvring to move it to the sawmill section by the power plant. The travelling cranes took out stop logs and fed it through the openings of the dam.

The Churchill river is remarkably clean in this section though, compared with the bush country through which it flows. However, I got a picture of the floating island from a resident and here it is as a natural curiosity.

The superintendent at Island Falls is Rees W. Davis, born in Clarence Hill, Alta., and educated in the University of Utah. Salt Lake City. The assistant superintendent is M. E. Hufnagel and the company operating Island Falls is the Churchill River Power Company, Ltd., a subsidiary of the Hudson Bay Mining and Smelting Co., Ltd.

Prefer Lonely Job

More than 300 men, who say in their letters that they seek to escape the "city blues" and "false civilization", have applied at Melbourne, Australia, for four positions vacant in lighthouses. Most of them admit they have had more experience as policemen, scenario writers, musicians, clerks, and train drivers than seamen."

SORE THROAT WITH COLDS Given Fast Relief

Take 2
"Aspirin" Tablets with a full
glass of water.

Crush 3 "Aspirin"
Tablets in 1/3 glass
of water—gargle
twice every few
hours.

The speed with which "Aspirin" tablets in relieving the distressing symptoms of common colds is utterly amazing.

... and the treatment is simple and pleasant. This is all you do. Crush and dissolve three "Aspirin" tablets in one-third glass of water. Then gargle twice every few hours, twice every day, until head and neck heat.

This medicinal gel will act almost like a local anesthetic on the sore, irritated membrane of your throat. Pain ceases promptly; rawness is relieved.

• "Aspirin" tablets are made in Canada. "Aspirin" is the registered trade-mark of the Bayer Company, Limited, of Windsor, Ontario. Look for the name Bayer in the form of a cross on every tablet.

The floating island approaching boom in front of Island Falls power house dam.

Floating island being pulled in-shore to be broken up and shot over the dam outside the danger point to the power plant.

A close-up of the floating island. Many feet thick and with trees eight inches in diameter. It rests against the boom at Island Falls before being broken up and washed away.

Shows Alarming Decline

Small Consumption Of Eggs In Canada Is Ruining Poultry Industry

Starting figures are presented by Fred W. Besson, Editor of Canada Poultryman, Vancouver, in a signed editorial, showing an enormous annual loss to the industry. He draws pointed and very timely attention to an alarming condition in one of Canada's major industries, an industry valued at more than \$100,000,000 annually, suffering the tremendous drop in domestic consumption of one billion eggs annually.

The Churchill river is remarkably clean in this section though, compared with the bush country through which it flows. However, I got a picture of the floating island from a resident and here it is as a natural curiosity.

Starting figures are presented by Fred W. Besson, Editor of Canada Poultryman, Vancouver, in a signed editorial, showing an enormous annual loss to the industry. He draws pointed and very timely attention to an alarming condition in one of Canada's major industries, an industry valued at more than \$100,000,000 annually, suffering the tremendous drop in domestic consumption of one billion eggs annually.

The question is asked: poultrymen, are you going to do to meet the competition of breakfast foods, vegetable and fruit juices which are daily pushing the egg off the dining tables of the Dominion?"

Figures from the Dominion Bureau of Statistics show the steady decline in egg consumption during the last ten years. Whereas the per capita consumption in 1927 was 356 eggs, it is down to 289 eggs, a decline of exactly eight dozen for every man, woman and child in Canada.

A petition is published asking the Hon. James G. Gardiner, Dominion Minister of Agriculture, to secure an appropriation of \$100,000 for the purpose of conducting a national advertising campaign similar to that now in effect for the Fishery industry, sponsored by the Department of Fisheries.

It is pointed out that many thousands of families are wholly dependent on egg production for a livelihood as well as thousands more employed in the distribution of poultry products. Besides these there are tens of thousands of farmers who rely on egg money to buy their groceries, clothe the children and pay taxes. Also large sums are lost to Canadian feed, supply and equipment houses, through smaller docks and lowered gross production.

When Experts Disagree

Sir Hugh Bell says the best way to spend money now is to save it, while Prof. J. N. Keynes, another English authority, declares, "When ever you save five shillings you put a man out of work for a day."

Slowly but surely we're coming to the belief that the experts don't know what they're talking about.

When experts disagree.

Spring Requirements!

Inexpensive School Shoes

Serviceable little school shoes that do not lose anything by their smart appearance. One-strap models for children and Misses, made from strong cream Elk leather; leather insole, strong comfortable "Sportex" outer soles. Repairable welt, counter and full back-strap. Sizes 5 to 10½ **1.19**
Misses' sizes 11 to 2 @ **1.49**

Misses' Oxfords

J. C. McFarland & Co., Irma, Alta.

LOCALS

Mrs. G. Watkinson spent a few days in Edmonton this week.

Mr. Clayton Peterson is recovering from an operation for appendicitis, performed in the Hardisty hospital.

Mr. Ross McFarland was fortunate in securing a large flow of soft water at his residence last Friday at a depth of 230 feet. Mr. T. Scheick was the driller.

Bring your jug to Elford's for Extra Fancy Barbado's Molasses. \$1.50 per gallon. A food and a tonic.

The Irma Branch, Canadian Legion, will hold a general meeting on Saturday, March 19th, at 8 o'clock, to make arrangements for the Vimy dance. All members are asked to attend.

Master Bobby Wilbraham accompanied his father to Edmonton this week and intends paying a visit to the Parliament buildings while the legislature is in session, to stop, look and listen at the doings of the M.L.A.'s.

The Irma Social Credit Group held their regular meeting at the home of E. L. Elford Monday evening, Mar. 7. There was a large number present and a lively interest shown in the work. A number of new members joined. It was decided to hold a social evening in Ki-fer's hall on 17th of March.

A meeting of the Irma High school board was held last Saturday, March 5th, at which the report of the delegate to the Trustees' convention was given and accepted. Mr. F. C. Wiese is the trustee representing Strawberry Plains school district now in place of Mr. A. E. Blakley.

Mr. F. M. Hill is attending Grand Lodge of the I.O.O.F., in his official capacity of Grand Conductor, in Edmonton this week. Mr. Jas. A. Hedley, official delegate from the Irma lodge, and Mr. Chas. Wilbraham are also attending Grand Lodge.

Don't forget the social evening to be held by the Irma Credit group in Ki-fer's hall, Thursday, 17th of March. A committee of Dr. Glasgow, Mrs. Hager and E. L. Elford are looking after the entertainment for the evening and a good time is anticipated for all. Social Creditors with their families are invited.

I have taken over the International Harvester Co., and Imperial Oil agency at Hardisty, and have on hand a large supply of eveners, plowshares and numerous other articles you will be needing now, which I will sell cheap for cash. Much of this stock was taken over before the increase in price. I am willing to pass these goods along cheaper than you can buy them elsewhere. There are also some second-hand McCormick-Deering tractor repairs at ½ their new price. This supply is getting smaller every day so don't delay in fixing up that old 15-30. Spring is just around the corner. Drive down. It will pay you — F. Clifford Saville.
